

## What is a plan, anyway?

At its heart, your plan is comprised of issues, which show in the Scope column. You can create new issues, edit issue summaries, expand parent issues to show their children, or view the issue in your backlog.

2/7

[Learn more](#)

[Next](#)

## An eye for details

Add or remove columns to highlight important planning information like issue dates, which team is working on a task, estimated amount of work to complete it, and data from custom fields.

2/7

[Learn more](#)

[Next](#)

## Your plan, visualized

This is the part of the plan that really impresses. Issue data such as dates and dependencies is displayed here, along with releases and other planning data.

2/7

[Learn more](#)

[Next](#)

## A bird's eye view

Issues are just one part of your plan. Use this menu to view releases and teams included in your plan, plus other layers of information.

2/7

[Learn more](#)

[Next](#)

## Show and tell

Use filters to only show issues that are relevant to what you're working on. You also can create multiple views of your plan, each with a unique story, and recall them on demand.

2/7

[Learn more](#)

[Next](#)

## Find your look

Give your plan some life by changing how your issues are grouped and sorted, adding colors to issues, and more.

2/7

[Learn more](#)

[Next](#)

## Save your changes

Your plan is a sandbox environment, meaning the changes you make here aren't committed until you're ready. Use this button to save your changes and get down to work.

If changes are no longer needed, you can easily discard them.
